Don't Panic STEM curriculum support

Technology Teacher Professional Development

by Peter and Ruth Thompson

This is a course introducing educators to Fusion 360. Fusion 360 is Autodesk's leading CAD solution. It connects your entire product development process in a single cloud-based platform that works on both Mac and PC. Using Fusion 360 you able to create iterations of your design ideas, create assemblies and make photorealistic renderings and animations. You can generate tool paths and use the 3D printing workflow to create a prototype direct from the software.

This software is free to students and teachers. Participants will leave the course able to install and draw products suitable for high school technology and engineering subjects. They will be able to manage Fusion 360 in a school environment and develop resources for use in the classroom.

When: 27th - 28th August 2021
