NESA endorsed provider

Introduction to Digital Technologies for novices

Armidale
September 21st
Armidale RSL

This course is for those who have little or no background in digital technology. It will cover the absolute basics of what we mean by data and the storage and transmission of data in networks. The content will specifically target Technology Mandatory Digital Technologies outcomes and provide strategies for implementing them with students.

You will learn about:

- ▶ What is meant by 'digital'?
- ▶ Bits and Bytes, storage and transmission.
- ▶ Binary, text and images
- ▶ Artificial Intelligence, Data Science, AR /VR
- ▶ Coding blocks and text
- ▶ Integrating some digital knowledge into 'regular' lessons / projects

The course will provide access to resources and ongoing support through a collaborative space.

NO knowledge of digital technology is expected of participants.
